

MIGRATION AND TRANSFER OF SUBSCRIPTION CONTRACT

This form is completed by the customer who takes over the subscription(s). Please, write in block letters.

Name (of the remaining customer): _____

Address: _____

Zip code: _____ City: _____

If you or your family member have registered two or more customer ID numbers with two or more subscriptions, and orders are delivered to the same address, you can combine subscriptions under a single customer ID number. Please fill in the information below so that we can make changes!

I want to keep existing ID number with associated subscription:

--	--	--	--	--	--	--	--	--	--

After changes are made **customer will receive combined monthly invoice for all associated subscriptions**, only single freight fee will be included.

After subscription migration will be made, **changes will be permanent and irreversible.**

The subscription period and terms will remain unchanged for all associated subscriptions.
The agreed payment method associated with the ID number that you decided to keep, will remain unchanged.

Please note that order date, due date and delivery date will be adjusted to match subscription associated with the ID number that you decided to keep.

Please note that subscription combining **may affect or will affect customers / partners Z4F structure and qualification.**

In order to successfully combine costumers' subscriptions all associated subscriptions invoices must be paid within due dates.

The subscription contract(s) is transferred to the remaining customer with the same conditions and requirements that applied for the customer who is withdrawing. Withdrawal customer is responsible for payment until the actual date of transfer and shall also inform his/her retailer about the change. **Remaining customer then undertakes the full responsibility for the contract including remaining time on the subscription.** The remaining customer has read and approved Zinzino's general conditions for the current subscription.

Zinzino reserves the right to refuse a subscription combination and migration.
